Ball bearing track kit for a smooth and silent sliding motion

Narrow-mesh network for plastering

Strengthened vertical staves guaranteeing greater firmness

Upper crossbar in galvanised steel in order to give solidity to the entire system

Cavity unit in top quality galvanised steel with deep ribbings

Screw in spacer provides easy installation

Quality

We focus our attention on quality, combining the latest production methods in order to meet our customers' needs.

We guarantee the meticulous check of raw material throughout production and right up to the delivery of the finished product.

All cavity sliding systems have been thoroughly tested and come with a twelve year guarantee.

The Firm

Founded in 1987, SA&F is the leading company in the field of sliding door systems, and make use of the knowledge gained in twenty-five years experience.

The capabilities of its management and design team working in partnership with the manufacturing department, have enabled SA&F to take up the challenges posed by rapidly changing markets to produce new, creative and innovative solutions for a wide variety of applications.

SA&F have conceived ERMETIKA, the complete range of sliding door systems synonymous with innovation and flexibility. Sliding door systems for single rendered brick walls permit not only a more functional use of space but also create and enhance aesthetically beautiful interiors.

Need More Space?

Opening up space for design and use, the range from Alma Building Products allow rooms to utilise their maximum dimensions, enhancing levels of comfort and freedom.

By creating a cavity within a single brick wall, Alma Cavity Sliders remove the need for a standard swinging door whilst creating a seamless render for a perfectly finished wall.
